

Penizine & Penizine Plus

Multi use Preservation & Engineering Fluid

Preserves, lubricates, and seals - & it works!

PRODUCT DESCRIPTION

Penizine was developed to meet a demand in the market for a high quality water dispersant and lubricant that would resist drying. Traditional products would dispel water, but over time would dry out, leaving the exposed surface to moisture and humidity – resulting in rust. Penizine and Penizine Plus offer superb lubricity, with the protection of technical grade lanolin.

Once applied, Penizine will not wash off with water, making it an ideal protectant in humid or even marine environments. Penizine may be used for long term preservation of parts, as well as a transit coating for exporting. Penizine is safe on all surfaces including alloy components.

USES

- ✓ **Surface Coating** – Use as a protective coating to guard against corrosion
- ✓ **Lubricant** – Both Penizine and Penizine Plus provide superb lubricity for hinges and joints.
- ✓ **Penetrant** – Penetrates and loosens threads, locks etc. Then guards against future sticking
- ✓ **Machining** – Improves cutting, drilling swaging. Extends the life of drills, dies, taps.

Untreated section of engine block shows severe signs of corrosion. Treated side with Penizine applied will resist corrosion for extended periods.

Penizine Plus: Penizine Plus has all the benefits of the standard Penizine, but contains extra lanolin – for heavier applications such as marine environment.

APPLICATION

Penizine and Penizine Plus are truly multi use metalworking fluids. Ideal for a wide variety of metal working and metal preservation uses. Use when machining components (drilling, tapping, swaging) as a machining aid, and the remaining Penizine will then act as a surface coating to protect against corrosion. Use as a penetrant to loosen locks, bolts and fasteners, and then they are protected – *permanently*. Use as a general purpose lubricant to quieten noisy hinges and joints. There is no other product like it.

- ✓ *Will not dry out*
- ✓ *Lanolin – protection against rust*
- ✓ *Available in extra heavy duty*
- ✓ *Ideal for all metal applications*

CHARACTERISTICS

Appearance	Semi Transparent oil
Specific Gravity	0.9
Flashpoint	175 °C
Characteristics	non drying
Use	Penetrant, Lubricant, Machining Aid, Surface Coating

Penizine is an ideal penetrant to loosen rusted bolts.
